

## Emergency Restoration Kit

The Connectivity Hardware features the most aggressively designed modular products used in today's fiber optic networks. Our Connectivity Hardware provides optimum performance in terms of accessibility, function and high capacity for a diverse marketplace with a wide range of applications. As one of the world's largest manufacturers of communication products, we have the expertise, technology and manufacturing resources to provide a total end-to-end solution to support your fiber, cable, and systems requirements

Network operators can efficiently restore damaged networks with Alcatel's Emergency Restoration Kit (ERK). This rugged, self contained unit includes the tools needed to bridge breaks in fiber optic networks. Complete with two weatherproof splice closures, a high fiber count optical cable, and all the tools needed for mechanical splicing and installation, the ERK saves downtime and labor costs. Stored in strategic locations throughout your territory or kept on hand in service vehicles, the ERK from Alcatel enables the fast resolution of physical network disruptions. An accompanying tool kit is available.

Dimensions (H x W x D):  
ERK Case = 20.5 x 26.5 x 9.5"  
(521 x 673 x 241mm)  
Tool Kit = 20.63 x 24 x 8.75"  
(524 x 609 x 222mm)  
Cable Reel = 7.75H x 16" dia.  
(197mm H x 406mm dia.)  
ERK Weight = 55.6lbs (25kg) (with cable reel & cases)  
minimum bend radius: with load: 10" (25cm)  
no load: 5" (12.5cm)

**Let FDI be your supplier of quality products!**
